

MIDLAND FACILITY

Warehouse and Blending Facility

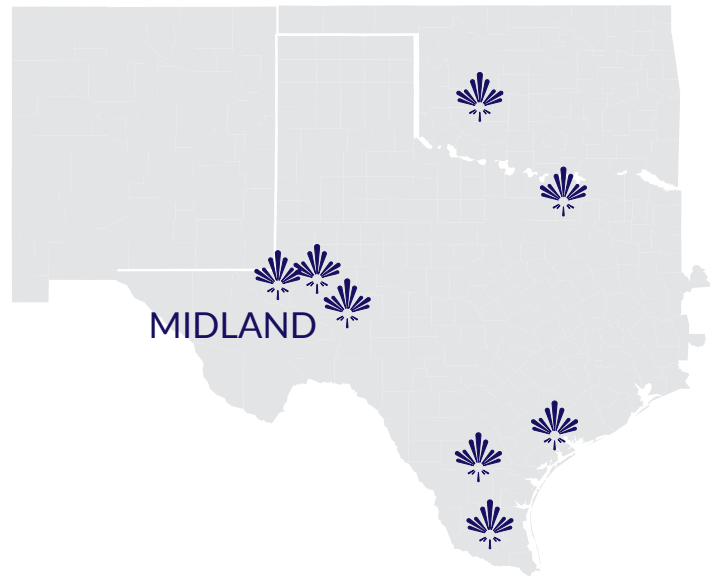

The Midland Facility located in Midland County features a 20,000 square foot warehouse, 7,500 square foot 3-sided pole barn and operates on 24-hour regional dispatch with a mud engineer on duty at all times to perform required mud checks in the on-site mud testing lab.

FACILITY OVERVIEW

The Midland facility services the Permian Basin with a full mixing facility and chemical warehouse. The liquid mud plant supports water-based, oil-based, or synthetic-based drilling fluids.

As the Permian Basin grows in drilling activity, AES, once again, prepares to support that growth with new infrastructure. As we have shown with our other locations, expansion and addition of facilities relieve local bottlenecks and enhance operational flow throughout all facilities in the region.

AES Drilling Fluids is constantly upgrading facilities to meet the needs of its customers. Confirm the latest capabilities and locations with an AES account manager.

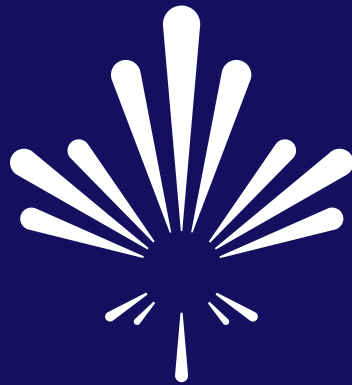

FEATURES

- 9-acre property in Midland County
- 20,000 sq. ft. warehouse
- 7,500 sq. ft. 3-sided pole barn
- 3,400 sq. ft. office space
- 10,000 OBM storage capacity
- 1,400 bbl of OBM building capacity

- 6,000 sacks of bulk barite mud plant storage
- 1,000 bbl diesel oil storage
- 1,000 bbl calcium chloride brine
- 500 bbl fresh water storage
- Dedicated 24-hour mud lab
